# Hi! I am Joo Hyun 👋🏻

Academic Director at BES

Hi, my name is Joo Hyun Lee, and I currently work as an Academic Director at a secondary international school in Seoul, South Korea. I am pursuing a Master of Science in Data Science at Johns Hopkins University to transition my career into bioinformatics. With a Bachelor's degree in Biomolecular Science from New York University, I hope to strengthen my ability to analyze large-scale datasets and apply data science skills to biological and healthcare-related research.

Module 1: Portfolio Website

Description

This project is a personal developer website built using Flask. It introduces my background and provides contact info and project links. Working with Flask, a micro web framework written in Python, I was able to learn to work with HTML, and cascading style sheets (CSS) to describe how HTML elements are to be displayed. The output is a functional personal website that includes details about you, your projects, and contact information.

Tools Used

Flask, HTML, CSS, Bootstrap, GitHub, Searching Methods
